Motor neurons in the spinal cord have dendrites that receive signals from other cells, and a long axon that extends to the muscles through peripheral nerves. Interneurons connect sensory and motor neurons to each other and have short dendrites and a branched axon. The other cells of the nervous system are called glia.

How research helps us look inside the brain - Big Picture

The human brain is the most complex organ of the body, and arguably the most complex thing on earth. This booklet is an introduction for young students. In this booklet, we describe what we know about how the brain works and how much there still is to learn.

LANGUAGE I Memory and Learning Train your brain!

This is not just an emotional response to troubling events; it's the expression of a persistent deregulation of body and brain chemistry. Brain is assaulted by neurotransmitters -- brain chemistry can be altered for decades. With this change, arousing events can trigger flashbacks. Trauma creates chaos in our brain.
