A cognitive bias is a systematic pattern of deviation from norm or rationality in judgment. Individuals create their own "subjective social reality" from their perception of the input. An individual's construction of social reality, not the objective input, may dictate their behaviour in the social world. Thus, cognitive biases may sometimes lead to perceptual distortion, inaccurate judgment ...

Or can computer-based, cognitive training improve driving performance and safety? Fortunately, an increasing number of randomized controlled trials (RCTs) are assessing whether cognitive training, such as adaptive computer-based programs, can create improvements in trained performance and whether the benefits of such training will transfer to untrained tasks and skills.
