### **the elements of influence pdf**

Influence is the application of power to accomplish a specific purpose. Research shows that people typically try to lead and/or influence others using ten positive influence techniques: logical persuading, legitimizing, exchanging, stating, socializing, appealing to relationship, consulting, alliance building, appealing to values, and modeling.

An influence diagram (ID) (also called a relevance diagram, decision diagram or a decision network) is a compact graphical and mathematical representation of a decision situation. It is a generalization of a Bayesian network, in which not only probabilistic inference problems but also decision making problems (following the maximum expected utility criterion) can be modeled and solved.

The abundance of the chemical elements is a measure of the occurrence of the chemical elements relative to all other elements in a given environment. Abundance is measured in one of three ways: by the mass-fraction (the same as weight fraction); by the mole-fraction (fraction of atoms by numerical count, or sometimes fraction of molecules in gases); or by the volume-fraction.
