An Introduction to the Five-Factor Model and Its Applications

The Big Five is a theory of personality that identifies five distinct factors as central to personality. Here's an overview of this OCEAN model.

Big Five Personality Traits & The 5-Factor Model Explained

The Big Five personality traits, also known as the five-factor model (FFM) and the OCEAN model, is a taxonomy for personality traits. It is based on common language descriptors. When factor analysis (a statistical technique) is applied to personality survey data, some words used to describe aspects of personality are often applied to the same person. For example, someone described as ...

Big Five personality traits - Wikipedia

A five-factor model directed at capturing the size, value, profitability, and investment patterns in average stock returns performs better than the three-factor model of Fama and French (). The five-factor model's main problem is its failure to capture the low average returns on small stocks whose returns behave like those of firms that invest a lot despite low profitability.
