Implosion is a process in which objects are destroyed by collapsing (or being squeezed in) on themselves. The opposite of explosion, implosion concentrates matter and energy. True implosion usually involves a difference between internal (lower) and external (higher) pressure, or inward and outward forces, that is so large that the structure collapses inward into itself, or into the space it ...

Mechanical engineering is the discipline that applies engineering, physics, engineering mathematics, and materials science principles to design, analyze, manufacture, and maintain mechanical systems. It is one of the oldest and broadest of the engineering disciplines.. The mechanical engineering field requires an understanding of core areas including mechanics, dynamics, thermodynamics ...

Mechanical Seals. Top entry mixers and bottom entry agitators on sealed tanks will have some sort of mechanical seal. For many sanitary process vessels, the mixer must have some type of sealing barrier to provide either a dust tight vapor seal, a pressure tight seal to allow pressure or vacuum in the mix tank, or an aseptic sealing device to provide a hygienic seal between the tank id and the ...
